

SIBANANDA PATHY

DATA ANALYST

sibanandapathy8270@gmail.com | +91 9337559261 | Berhampur, Ganjam, Odisha 761102 | [LinkedIn](#) | [GitHub](#)

ABOUT

Pass-out Electrical Engineering student and data analyst with hands-on experience turning raw, messy datasets into decisions people can act on. Built five end-to-end analytics projects in Python, SQL, Power BI, and Tableau — cleaning and analyzing over 1,000 rows of data per project to surface KPIs, spot trends, and support business decision-making. Guest faculty experience has sharpened something a lot of technical people struggle with: explaining complex ideas simply, to an audience that needs clarity, not jargon. Certified in data analytics by Google, LinkedIn, Deloitte, and Tata, and comfortable working independently under tight timelines.

CREDENTIALS

Data Analysis with Python

Issued by freeCodeCamp

Skills: Data Analysis, Python, Testing

Credential ID: fcc-4dc8c91e-519c-4adc-b416-fb9c6e8327fc-dawp

Deloitte Australia — Data Analytics Job Simulation

Issued by Forage

- Completed a simulated data analytics and forensic technology engagement — built a data dashboard in Tableau and used Excel to classify data and draw business conclusions.

Credential ID: jZKuhRDarihovhFmx

Introduction to Career Skills in Data Analytics

Issued by LinkedIn Learning

Skills: Data Analysis, Data Visualization

Credential ID: b06960ca2b3672ca580fd9a8cc2bc1e50617086cfec6f0215046566ac13007e5

Google Analytics Certification Aug 2025 · Expires Aug 2026

Issued by United Latino Students Association

Skills: Data Analysis

Credential ID: 157850850

Tata — GenAI Powered Data Analytics Job Simulation

Issued by Forage

- Conducted exploratory data analysis over 500 lines of a database using GenAI tools to assess data quality and identify risk indicators.

Credential ID: x8zbmDgMmcy4nzLP7

PROJECTS

Energy Market Resilience Metrics — KPI & Performance Analysis Aug 2025

- Analyzed historical energy data, market trends, infrastructure, and regulatory changes for Energix Enterprise, a 20+ year electricity generation and distribution company, to assess operational efficiency and compliance risk.
- Integrated and calculated key performance indicators from a dataset of 1,000+ rows using Python, pandas, and NumPy.
- Visualized results in Matplotlib and Seaborn to reveal a direct correlation between aging infrastructure and rising compliance costs, informing strategic planning and risk mitigation.

Tools: Python, pandas, NumPy, Matplotlib, Seaborn

GitHub: https://github.com/Sivaan66/Energy_Market_Resilience_Metrics--Analyzing_Vulnerabilities.Python

Bank Database Management System

- Designed and built a full banking application in Python (OOP) backed by a MySQL database, handling sign-up/login, deposits, withdrawals, balance checks, and fund transfers for around 1,000 simulated user records.
- Structured customer and transaction tables using core SQL operations (DDL, DQL, DML), logging every transaction — amount, date, and time — against the originating account for full traceability.

Tools: Python, MySQL, SQL (DDL/DQL/DML), Object-Oriented Programming

GitHub: https://github.com/Sivaan66/Bank_Database_Management_System

Delinquency Prediction — Python & Generative AI

- Built an end-to-end Python ML pipeline (pandas, scikit-learn, imbalanced-learn) on a 500-record, 19-feature financial dataset with 16% class imbalance (80/500 delinquent accounts)
- Engineered features via missing-value indicators, LinearRegression-based income imputation, and employment-category standardization, resolving missingness across 39 Income, 29 Loan_Balance, and 2 Credit_Score records

- Built a ColumnTransformer + SMOTE + RandomForestClassifier(n_estimators=200) pipeline, evaluated with classification report, confusion matrix, ROC-AUC, and PR-AUC on a 125-record stratified test set
- Diagnosed model performance quantitatively — 83.2% accuracy but 0.475 ROC-AUC and 0.0 recall on the delinquent class at default threshold — pinpointing an imbalance-driven metric trap missed by accuracy alone
- Produced 5 diagnostic visualizations (target distribution, correlation heatmap, ROC curve, precision-recall curve, top-10 feature importance chart) to communicate data structure and model behavior to stakeholders.

GitHub: https://github.com/Sivaan66/Delinquency_Prediction_Python_GenAIProjct

Marketing & Advertising Analysis for Album Release — Power BI

- Imported two datasets (3,000 rows × 11 columns and 11 rows × 5 columns) into Power BI to support a global marketing strategy for a recording artist's second album.
- Selected and tracked around 15 KPIs, building an interactive dashboard to identify opportunities for growing the artist from a regional to an internationally recognized act.

Tools: Power BI, Excel, EDA, Data Visualization

GitHub: https://github.com/Sivaan66/Power-BI-Music_Industry_Sales_Dashboard

Pizza Sales Analysis — SQL Analytics

- Performed end-to-end EDA and data cleaning on a pizza company's sales database using MySQL Workbench, analyzing 1,000+ rows to identify top-selling products and customer engagement trends.
- Built and ran a SQL-based ETL pipeline to consolidate sales data, surfacing patterns that improved insight generation for business growth by an estimated 30%.

Tools: MySQL, SQL, Workbench, ETL, EDA

GitHub: https://github.com/Sivaan66/Project---Pizza_sales

EXPERIENCE

Guest Faculty 12/09/2025 - 18/4/2026

Government Polytechnic College, Bargarh, Odisha

- Deliver lectures and lab sessions to diploma-level engineering students on core Electrical Engineering subjects, breaking down technical and quantitative concepts into clear, practical explanations.
- Design course content, assignments, and assessments; evaluate student performance and provide structured feedback to support learning outcomes.
- Guide students through practical and project-based work, encouraging a data-driven, analytical approach to problem-solving.
- Coordinate with department faculty on curriculum delivery and academic scheduling, reinforcing process discipline and reliable, on-time execution.

SKILLS

Programming & Query Languages: Python, SQL (DDL, DML, DQL, Joins), MATLAB, Simulink

Data & Analysis Libraries: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

BI & Visualization Tools: Power BI, Tableau, Microsoft Excel

Platforms & Tools: MySQL Workbench, VS Code, Git, GitHub, Jupyter Notebook

Core Competencies: Data Cleaning, Exploratory Data Analysis (EDA), Data Visualization, Predictive Analysis, Statistical Analysis, ETL, Data Modeling, Dashboard Reporting, Data Storytelling

Soft Skills: Time Management, Verbal Communication, Team Collaboration, Process Awareness, Continuous Learning

EDUCATION

Bachelor of Technology — Electrical Engineering 2021 – 2025

Veer Surendra Sai University of Technology (VSSUT)

Higher Secondary Education (12th) 2018 – 2019

Central Board of Secondary Education (CHSE)
